City State Zip Code

COUNTY BOARD OF SUPERVISORS

Gentlemen:--

Approval is hereby requested of underground construction of

(Describe fully work contemplated)

**Plat of proposed underground construction showing location and other
pertinent information, shall be attached to each copy of the application.**

The proposed line will be located _____ miles _____ from _____
(Direction) (Place, town,
etc.)

more specifically described as follows: _____

AGREEMENTS: The applicant agrees that the following stipulations shall govern under this permit:

1. Fees: \$100 minimum to \$1,000 maximum payable to Henry County Treasurer. Waived at County's discretion.
2. All trenches constructed longitudinally along the road shall be placed not closer than _____ feet from the edge of the pavement, or not closer than _____ feet from the centerline of unpaved highways.
3. The applicant will at any time subsequent to placing the cable, pipe line or tile line, and at his own expense, relay, reconstruct or encase his lines as may become necessary to conform to new grades, alignment or widening right-of-way, resulting from maintenance or construction operations by Henry County irrespective of whether or not additional right-of-way is acquired in connection with such highway improvement. The applicant agrees to do this promptly on order by the Board of Supervisors, and without cost to the County. If the applicant is unable to comply promptly, the County may cause the work to be done, and the applicant will pay the cost thereof upon receipt of statement.

The County will endeavor to give the applicant sufficient notice of any proposed construction or maintenance work, on either existing or newly acquired right-of-way, that is likely to expose, cover up, or disturb any cable, pipe line, or tile line belonging to the applicant, in order that the applicant may arrange to protect his lines. The County will inform contractors, and others working on the job, of the location of the lines so that reasonable care may be taken to avoid damaging the lines. The County assumes no responsibility however, for failure to give such notice.

4. The County assumes no responsibility for damages to the applicant's property occasioned by any construction or maintenance operations on said highway, including new or additional right-of-way acquired in connection therewith, subsequent to the building of the said pipe line, conduit or tile line.
5. The applicant shall take all reasonable precaution during the construction of said cable, pipe line, or tile line to protect and safeguard the lives and property of the traveling public and adjacent property owners and shall save the County harmless of any damage or losses that may be sustained by the traveling public or adjacent property owners on account of such construction operations.

6. Operations in the construction and maintenance of said cable, pipe line, or tile line shall be carried on in such a way as to not interfere with, or interrupt traffic on said highway.
7. The applicant shall hold the County harmless from any damage that may result to said highway because of the construction or maintenance of said cable, pipe line, or tile line, and shall reimburse the County for any expenditure that the County may have to make on said highway on account of said applicant's cable, pipe line, or tile line having been constructed thereon.
8. The applicant agrees to give the County forty-eight hours' notice of its intention to start construction on the highway right-of-way. Said notice shall be made in writing to the County Engineer.
9. Cable, pipe line and tile line crossings shall be constructed as follows: Water mains 2" or less inside diameter shall be copper, lead or cast iron. Water mains of more than 2" inside diameter shall be cast iron and be encased. The casing shall be of adequate strength, and of sufficient length to extend 2' beyond the edge of the shoulder line. Pressure sewer lines shall meet the same requirements as water mains. Gravity sewer lines and tile lines shall be cast iron pipe or an approved extra strength pipe and need not be encased. Underground telephone and electric cables shall be installed in a casing. Natural gas service lines and mains in town distribution systems need not be encased except as may be required of (9) below. On paved roads cables, pipe lines and casings may be placed through the subgrade by jacking, or by boring a hole just large enough to take the line; or if the county engineer approves, a tunnel may be dug through and the cable, pipe line or casing placed therein. On roads not paved an open trench may be dug and the cable, pipe line or tile line placed therein, and the trench backfilled over the line. All backfill of tunnels and trenches shall be thoroughly compacted in layers of 6" or less in depth. All work shall be done in a workmanlike manner, and the ground left in a neat condition satisfactory to the county engineer.
10. Pipe lines conveying gas, natural or artificial, oil, gasoline, motor fuel or other inflammable substances under and across primary roads shall be installed in accord with rules of the Iowa State Commerce Commission and American Standard Transmission and Distribution Piping System requirements.
11. This permit is subject to any laws now in effect or any laws which may be hereafter enacted.
12. This application is subject to revocation by the Board of Supervisors at any time, when in the judgment of the Board it is necessary in the improvement or maintenance of the highway or for other reasonable cause.
