

Dear All Concerned,

I Just to clarify a couple things reference the Iowa County Building Permit.

The Iowa County 911 Office is not assigning addresses for every structure that is built; only the new builds (residences, businesses, etc).

The phrase "building permit", is misleading; you might think you need a 911 address for every building. That is not true. If you build a new shed on your property, the shed will not be assigned an address.

The purpose of the new document is for the various offices involved to be aware of and get appropriate information. This way we can all do our part in getting an approved driveway, a parcel number assigned, and a new 911 address.

I hope this clarifies up a little of the confusion there might have been.
